PRESENTATION DETAILS

JET PRESENTATION: Ed Schloss

This introductory course will give the designer, installer and service provider an overview of the Jet BAT Media system, how it operates and the routine maintenance that is required. The Jet Inc. aerobic wastewater treatment plants utilize a dual process biological system using an activated sludge process in conjunction with an attached growth process to achieve biological treatment.

ELJEN PRESENTATION: Duane Mowery

We will discuss the Eljen technology and the PA approval, including time dosing, and how SEO's may be able to apply the technology to new and repair sites. Central to his discussion are the unique characteristics of the technology that allow for applications on challenging sites, the availability of historical data and manageable maintenance requirements.

AMERICAN MANUFACTURING PRESENTATION: Bryan Allen

American Manufacturing Drip Dispersal is a land application system for dispersal of effluent on decentralized environments. We will provide an overview of our drip equipment, installation methods and O&M for our three PA Onlot Alternate Technology Listings including: primary effluent, secondary effluent, and drip micro mound approvals.

PREMIER TECH PRESENTATION: Barry Helverson

We will discuss how Ecoflo coco biofilters successfully treat wastewater while reducing the footprint of your septic system. We will also cover design guidelines, installation procedures, and proper operation and maintenance of our systems. Lastly, we will review our product line, including UV Disinfection and Denitrification options.

INFILTRATOR PRESENTATION: Cody Vigil

We will show the various tanks available and review how chambers can be used to reduce the size of sand mounds.

ORENCO PRESENTATION: Brent Hershey

This overview will explain how the Advantex System works, when to use it, and how to show it on the design.

POLYLOK PRESENTATION: Twain Glaser

We will discuss the various effluent filters in the market and the differences between them. In addition, we will show safety products offered by Polylok.

PLANT TOUR: John Wagman

The tour will showcase a modern precast concrete manufacturing facility. We show every step involved in manufacturing precast concrete septic tanks, pump tanks, and other components involved in septic systems.
